

STOP THE WARMONGERS

The Iraq quagmire deepens

John Howard and the Liberal Party have committed more Australian servicemen and women to the war in Iraq – folly at best, or servitude to the USA at its worst.

In classic guerrilla warfare there can be no end to the resistance, until the moral or physical defeat of the invader – no matter how long it takes.

Other nations, like Holland, Spain, and the Ukraine have withdrawn their troops from this destructive guerrilla war.

Commitment of more troops exposes the ever-present servile psyche in Liberal Party politicians towards foreign interests; solidarity with American warmongers – inevitably to the cost of Australian Defence Force personnel, and eventually to all Australians.

A legacy of death

The invading US forces have used depleted uranium weapons throughout wide areas of Iraq. Exposure results in radioactive sicknesses, leukaemia, and cancers – it's a pollutant of death.

Australians have been deployed in areas that are heavily polluted, where Dutch forces have already experienced widespread radioactive-induced sickness.

Australia First

Australia First

The UN has called for depleted uranium munitions to be banned. The cleaning up of this toxic waste is process that is well beyond the capacity of military forces in a conflict zone. Yet, normal life cannot exist where it has contaminated.

But none of this is of any concern to the Howard-Downer-Hill clique – they repeat the Fraser-Chipp attitude to Agent Orange in an earlier American war.

Lies, lies, and more lies

The media has exposed that the Americans had made a decision to go to war no matter what, and would lie to do so. False information tying Iraq to biological weapons, weapons of mass destruction, and to terrorist group Al-Qaeda was given as the basis of the deceit used to justify invading Iraq.

Weapons inspectors, both before and after the invasion, found no such capacity or connections.

An investigation is needed to find out if Liberal Party politicians deliberately deceived the Australian people, and – if confirmed – to question their fitness for public office.

War Crimes inquiry needed

The Howard Government's participation in the unprovoked attack on Iraq is a prima facie case for charges of war crimes. The United Nations has clearly stated this war is illegal, and no mandate for war was ever issued by the Australian people.

For Australians, the participation of the ADF under Howard is a cause of national shame, that can only be cleansed from the national consciousness by a calling to account of politicians before a Royal Commission.
