

Eleven Points For Action In The Federal Election

Australia First Party stands in this election with a programme for action and change for our country.

Any Australia First representative elected in the upcoming Federal election, is pledged to advocate these policies. The party is pledged to motivate the community generally to support these demands.

We demand that **YOU** the people should be represented in the parliaments and not be the victims of cynical, corrupt, and foreign-loyal party machines.

We demand the Implementation of *Citizens' Initiated Referendum* and *Voters' Recall* of parliamentarians, so you the people can propose the laws and get rid of unresponsive parliamentarians.

We demand accountability for all politicians: for all those who have failed and corrupted Australia, sold the country to foreign states and agencies, or devoted themselves to globalisation; we pledge to *nationalize their personal property* and deny them parliamentary pensions and benefits.

We demand the promotion and rebuilding of Australian manufacturing and thence - Australian jobs for Australian workers.

We demand the re-instatement of the Commonwealth Bank as originally intended to limit interest rates and to eliminate the private control of the nation's credit.

We demand the control of currency exchange rates to end speculation in the national currency and resources.

We demand the reform of taxation, its simplification to end the exemptions for the speculators, the multinationals and the super-rich.

We demand an end to foreign ownership and control of Australian real estate and Australian resources.

We demand: the end of all immigration for a long period, a population policy for Australia ; the repudiation of all treaties on refugees ; the end of contract labour ; the end of residency for foreign students; the end of multiculturalism; the humane deportation of the refugees and other undesirable persons.

We demand that the Australian transport industry be freed of bureaucratic control with the end of world-parity-pricing for fuel and with public ownership of all roads and abolition of tolls.

We demand protection for Australian farmers by the provision of a guaranteed national market and pricing system, such that all food necessary to sustain the Australian People may be grown in Australia and regional Australia be maintained.
